

Bodzsár, É.B., Susanne, C. (2000, Eds) Human Population Genetics in Europe. EAA Biennial Books, 1.

Contents

- Susanne, C., Bodzsár, É.B.: Population genetics: "Modern" technology for an "old" study of human variation.
- Siváková, D., Scheffrahn, W., Nechvátalová, Z.: Ethnohistory and genetics of the Habans, a Slovak Hutterite isolate.
- Schmidt, H.D., Scheil, H-G., Scheffrahn, W.: The history and genetics of the Aromun populations.
- Budnik, A.: Genetic structure of historical and contemporary Kashubian populations in Poland.
- Caeiro, B., Burgos, M., Luis, J.R., Carril, J.C.: Multiplex DNA analysis of four new STRs: Anthropological implications.
- Vona, G., Chiarelli, B., Ghiani, M.E., Sineo, L.: Genetic structure of Sicily: A review.
- Floris, G., Sanna, E.: On the biological structure of the Sardinian people.
- Scheffrahn, W., Brandt-Casadevall, C.: Ethnohistory and genetic differentiation of Swiss Rhone valley populations.
- Susanne, C., Bajraimi, Z., Kurne, K., Mikerezi, I.: Gene variation within the Albanian and between the Balkan human populations.
- Rudan, I., Rudan, P.: Comparison between coefficients of inbreeding computed from deficit of heterozygotes for codominant autosomal genetic polymorphisms and from isonymy data: A study of Hvar Island isolates, Croatia.
- Bittles, A.H.: Consanguineous marriage and its outcomes in European populations.
- Bramanti, B., Hummel, S., Schultes, T., Herrmann, B.: Genetic characterisation of an historical human society by means of aDNA analysis of autosomic STRs.
