

***Bodzsár, É.B., Susanne, C. (2004, Eds) Physique and Body Composition – Variability and Sources of Variation. EAA Biennial Books, 3.***

***Contents***

- Susanne, C., Bodzsár, É.B.: On physique and body composition
- Claessens, A.L., Lefevre, J., Philippaerts, R., Thomis, M., Beunen, G.: Relation between body composition and Heath–Carter somatotype in adult males.
- Jaeger, U., Zellner, K., Kromeyer-Hauschild, K.: Body composition and type of body shape in schoolchildren from Jena/Germany.
- Tan, S.K., Pena Reye, M.E., Malina, R.M.: Somatotypes of rural and urban children in Southern Mexico.
- Tomazo-Ravnik, T., Kalan, N.: Anthropometrical characteristics, body composition and somatotype of elite swimmers at the age of 10, 12 and 14 years.
- Salces, I., Susanne, C., Rebato, E.: Familial correlations in body fatness indicators in the Biscay population.
- Buffa, R., Marini, E., Floris, G.: Bioelectrical impedance vector analysis (BIVA) in the Sardinian population.
- Kirchengast, S.: Proximate and ultimate aspects of body composition changes during menopausal transition.
- Zerbo-Sporin, D., Stefancic, M.: Body fatness and fat distribution in female university students.
- Satake, T.: Variation in bmi in physically active and non-active Japanese university students.
- Gyenis, Gy., Pásztor, Zs.Sz., Hidegh, A.H.: Prevalence of overweight and obesity assessed by the body mass index in the schoolchildren of the third Érd Growth Study.
- Cole, T.J., Roede, M.J.: A baseline to monitor international secular trends in obesity. centiles of body mass index for Dutch children aged 0–20 years in 1980.
- Bláha, P., Vignerová, J.: Longterm observations of body parameters of Czech children and adolescents.
- Schweich, M., Knüsel, C.J.: Physical variation in past populations.
